

YAW ADABOR NKRUMAH, MD

Board-Certified Family Medicine Physician | Primary Care Leader | Clinical Operations & Telehealth Systems
(803) 683-6664 | nkrumah_yaw@yahoo.com | NPI: 1063143204

PROFESSIONAL SUMMARY

Board-certified Family Medicine physician with full-spectrum ambulatory training in continuity care, chronic disease management, preventive medicine, and integrated behavioral health. As Founder and Medical Director of Sankofa Family Medicine, PLLC, designed and operationalized a regulated virtual primary care system encompassing panel architecture, telehealth and EMR infrastructure, clinical workflow design, compliance governance, and multidisciplinary care coordination. Demonstrated high-autonomy clinical and operational leadership across all domains of primary care practice design; prior MUSC research fellowship adds rigor in evidence-based methodology and clinical governance. Committed to whole-person, continuity-centered care aligned with VHA values of access, interdisciplinary collaboration, and sustained therapeutic relationships.

LICENSURE AND CREDENTIALS

Board Certification: American Board of Family Medicine (ABFM), Active | ABMS ID: 01384764

Medical License: Washington State, Active | NPI: 1063143204

DEA Registration: Pending, Washington State (application in process)

Life Support: ACLS | BLS | PALS, all current through July 2026

PRACTICE DEVELOPMENT AND SYSTEMS LEADERSHIP

Sankofa Family Medicine, PLLC | Founder and Medical Director September 2025 – Present
Spokane, WA | Virtual Primary Care Practice

- Designed a continuity-focused virtual primary care model, including panel architecture, access frameworks, visit structures, care continuity protocols, and whole-person health assessment, consistent with VHA PACT and whole-health delivery principles.
- Built and configured HIPAA-compliant EMR and telehealth infrastructure (Atlas.md); established asynchronous care pathways, structured documentation templates, and clinical workflow standards for consistent, reproducible ambulatory care delivery.
- Established comprehensive regulatory compliance governance: HIPAA Security Risk Assessment, Business Associate Agreements, Medicare opt-out compliance, Washington State licensure requirements, cybersecurity framework, and clinical and administrative SOPs.
- Coordinated multidisciplinary care delivery: laboratory integration (Quest Diagnostics), specialty referral workflows, and precision medicine capabilities (Nexus Health genomics; BioMatrix systems biology), within a structured longitudinal monitoring protocol.
- Functioned as sole physician executive across clinical operations, compliance governance, workflow architecture, and vendor management, demonstrating high-autonomy leadership directly applicable to directing a VA primary care clinical operation.

CLINICAL EXPERIENCE

Kadlec Family Medicine Residency (KFMR) | Family Medicine Resident July 2022 – June 2025
Richland, WA | Kadlec Regional Medical Center

- Maintained a longitudinal continuity panel across all three years of residency, including preventive care, chronic disease follow-up, acute visits, and comprehensive well-patient exams, for rural and semi-urban eastern Washington populations with high rates of cardiometabolic disease, psychiatric comorbidity, and complex social determinants of health.
- Delivered evidence-based longitudinal management across chronic disease (T2DM, HTN, HLD, heart failure, COPD, obesity, chronic pain) and full preventive care: age-appropriate cancer screenings, immunizations, cardiovascular risk reduction, and wellness visits across the lifespan.
- Integrated behavioral health across a panel with elevated rates of depression, anxiety, PTSD, substance use, and serious mental illness; managed medically and psychosocially complex patients using collaborative care frameworks, motivational interviewing, and trauma-informed approaches.

- Completed inpatient and ICU co-management (sepsis, respiratory failure, complex multimorbidity); collaborated with nurses, behavioral health consultants, social workers, and clinical pharmacists across care settings; contributed to QI and clinical workflow optimization initiatives.

CLINICAL RESEARCH FELLOWSHIP

Medical University of South Carolina (MUSC) | Clinical Research Fellow July 2020 – June 2021

Department of Otolaryngology | Charleston, SC

- First-author, peer-reviewed systematic review and meta-analysis on remdesivir for COVID-19 (Annals of Epidemiology and Public Health, 2021); sub-investigator on four IRB-coordinated clinical trials, including a Phase 3 multicenter double-blind RCT (Otonomy OTO-104, PI: Paul Lambert, MD).
- Managed all REDCap trial coordination (IRB submissions, participant tracking, protocolized data collection, protocol adherence monitoring); authored independent IRB application and designed diagnostic survey instrument, demonstrating analytical rigor applicable to VA quality improvement and evidence-based practice.

EDUCATION

Doctor of Medicine (MD) | Medical University of South Carolina (MUSC) | Charleston, SC | May 2020

Bachelor of Science, Biology, Cum Laude | University of South Carolina | Columbia, SC | May 2013
